## SIGN OFF YOUR DOCUMENTS ON THE GO!

Working very closely with healthcare professionals for over a decade, we realise that you are often out and about, either in the community or generally away from your work station.

We've listened to your requirements and requests and have developed an app to enable you to sign off your documents anywhere, at any time.

G2 Mobile, designed by G2 Speech, provides instant access to correspondance from any location, be that out in the community, at a different base or even at home. Fully integrated with SpeechReport's automated workflow, this app allows you to further reduce the turnaround time of documents. In just a few clicks, your secretarial team will be provided with feedback or finalised documents.

## KEY FEATURES OF THIS APP INCLUDE:

- Fully integrated with SpeechReport

- Part of the G2 Mobile solution, our hybrid platform

- Ability to sign off anywhere, at any time

- Add comments and notes to documents

- Following ISO 27002 and secured encryption of data

- Suitable for iOS, Android and Windows devices

- Change your view to personal preferences

## USER FRIENDLY SOLUTION

G2 Mobile syncs your workflow to your mobile devices by connecting directly to the SpeechReport platform. This application provides healthcare professionals with the ability to view, sign off and forward your reports at a time and location convenient to you. It's also possible to add notes to medical reports, as a personal reminder or as an instruction for your secretary. The app is compatible with iOS, Android and Windows devices.
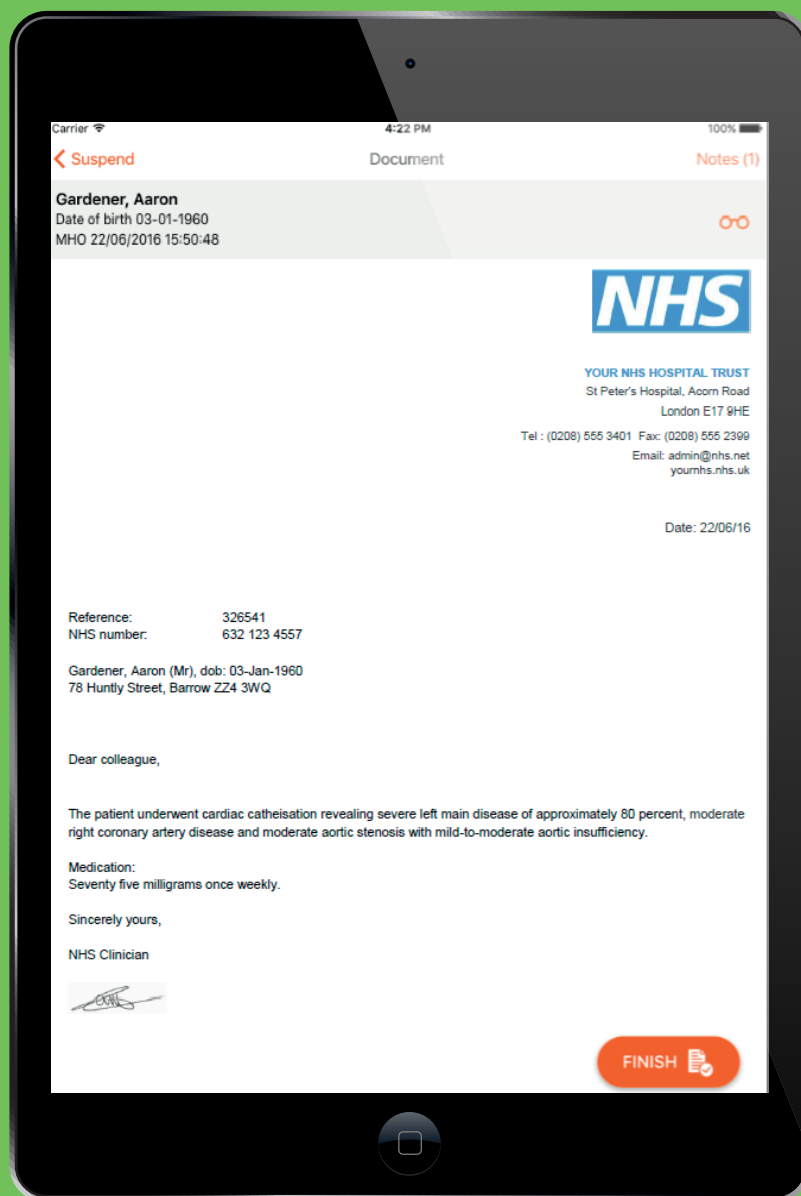

## SECURITY

G2 Mobile meets strict conditions to ensure the safety of patient data. The app has been designed according to ISO standards and encrypted data is transfered via secured lines.

The application is hosted on your hospital/Trust server. Documents are never stored locally on your mobile device. The log in details administered within the main SpeechReport platform, allow access permission to the app.

## SPEECHREPORT PLATFORM

The SpeechReport platform provides a fully automated workflow with advanced speech recognition technology. SpeechReport helps to streamline clinical correspondence processes. The solution supports your department, hospital or Trust to create, correct and manage all of your medical documentation in one central location.

G2 Mobile enables you to mobilise part of your workflow, supporting you to further reduce the turnaround time of documents.
