

G2 ANALYTICS

OPTIMISE WORKFLOW EFFICIENCY,
MAXIMISE ROI

Get to the heart of your data and let us help you maximise your performance. With G2 Analytics you are able to collect and analyse dictation data within minutes. Allowing you to make better business decisions and get the insights you need.

REAL-TIME INTELLIGENCE

G2 Analytics captures relevant data and presents it in a set of standard reports.

Providing insight in:

- Backlogs
- Department turnaround times
- Employee performance.

All reports are designed to provide an overview of progress and allow for in-depth, detailed analysis.

Carefully selected reports provide decision makers with relevant, actionable data to optimise workflow efficiency and maximise ROI.

DESIGNED FOR YOU

G2 Analytics was co-developed with users who work with our digital dictation and speech recognition software every day. People like you, looking for ways to simplify their way of working, but won't settle for less than high quality and reliable data. G2 Analytics provides the insight you need to help make well founded decisions.

Besides the standard report set, G2 Analytics is created in such a way that specific reports or dashboards overviews can be added. Our experienced Development Team can customise the application to your specific needs.

EASY TO USE

Just a few clicks is all you need to collect the data you require. G2 Analytics will generate standard reports or allows you to create your own custom made reports. Reports can be shared and automated, allowing you to export your data to a PDF, an excel format, CSV, mHTML or XML files, and send these via email.

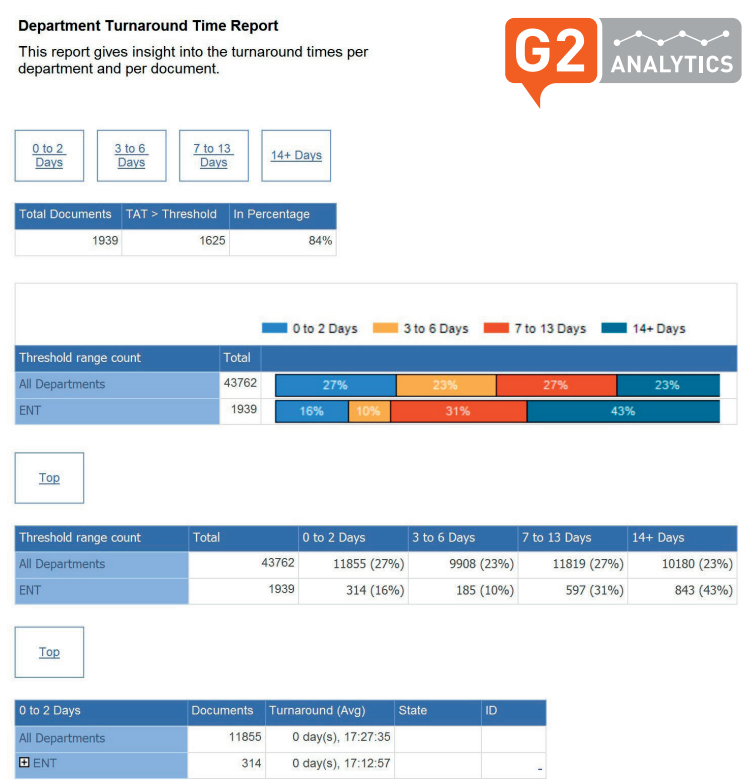

With a fresh tile design, the user interface has a modern look and feel. With an intuitive interface the application allows you to focus on what's most important: receiving and acting on relevant data!

The secure browser based application makes data available on various mediums; on your pc, laptop, mobile and tablet.

GETTING STARTED

Your Account Manager is at hand to provide a demonstration of G2 Analytics, presenting the benefits this powerful application has to offer. The set of standard reports provides you with relevant data, which will immediately allow you to optimise your workflow efficiency and maximise ROI!
