SPEECHREPORT CURSOR

DICTATE ON THE CURSOR WITH MINIMAL EFFORT!

SPEECHREPORT CURSOR

❝ speaking is five times faster than typing ❞

Maximise your productivity, by spending less time typing. Did you know that speaking is five times faster than typing? Well imagine the possibilities with our quick, simple and extremely powerful speech recognition solution...

SpeechReport Cursor, provided by G2 Speech, enables you to utilise your voice to create reports and dictate into MS Word, MS Outlook, EPR or any other third party solution.

This solution will enable you to spend less time reporting and more time on things with a higher priority like patient care.

HOW DOES IT WORK?

SpeechReport Cursor enables you to use advanced speech recognition capabilities to dictate into any clinical, non-clinical or Windows-based application (EPR, MS Word, MS Outlook or any other third party solution).
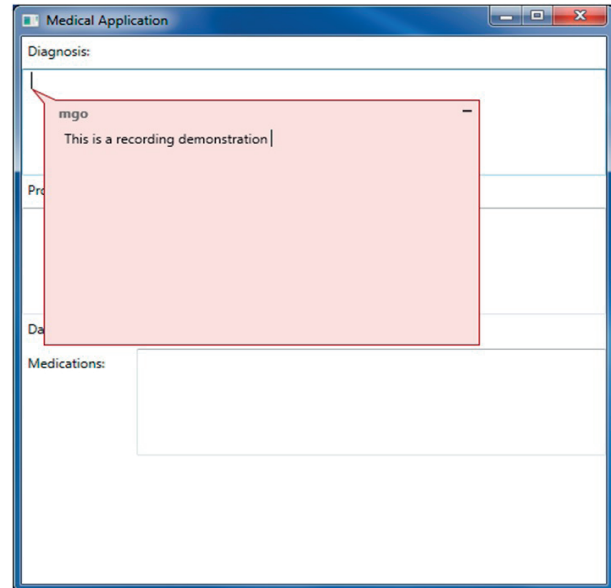

A small non-intrusive dictation window collates the dictated text and enables you to rewind and replay your dictation. There are also auto-texts, voice guided navigations and correction capabilities available within the solution. Upon completion, you can quickly and simply direct the dictation with just one click on the SpeechMike or your keyboard!

The auto-text features can assist with creating further efficiencies by enabling you to create standard text blocks with input fields, to minimise the amount of dictation required. This is extremely helpful when regularly repeating large sections of text.

DOING MORE WITH SPEECH

FUNCTIONALITIES

SpeechReport Cursor provides an advanced and intuitive feature set which enables you to:

- Adjust your screen layout with a moveable dictation box
- Correct dictations by voice
- Navigate using your voice
- Playback, fast forward and rewind your dictation
- Create auto-text for further efficiencies
- Access a standby/inactive mode when pauses or breaks are required
- Work with a headset instead of a SpeechMike
- Define your own function keys
- Simply and quickly access your dictation history.

ON-PREMISE VS. THE CLOUD

On-premise:

The on-premise environment is hosted, maintained and administrated on your infrastructure. This provides you with full access and control over the environment and includes the possibility to combine SpeechReport Cursor with the SpeechReport platform capabilities.

N.B. The SpeechReport platform provides advanced workflow and integration, with your EPR and other applications.

Cloud:

SpeechReport Cursor can also be deployed from our SpeechReport Cloud environment which provides flexibility and significantly less deployment costs.
G2 Speech is responsible for the technical maintenance of the server environment and administration of the system. This will save you FTE and operating/hardware costs.

ABOUT G2 SPEECH

G2 Speech was founded in 1998. Over the 15 years we have been established, we have polished and perfected the art of providing digital dictation, speech recognition and workflow management solutions that fit the needs of our customers. We successfully provide our product in the UK, Ireland, Belgium and Holland. Within the UK we currently deliver solutions to over 35 major NHS Trusts.

Let us help you reduce costs and time pressures and increase your productivity. Contact a member of our team.

EASY TO USE

SpeechReport Cursor is extremely straight forward and simple to deploy. Within a few clicks you will be ready to start your dictations. The client installation only takes a few seconds. After the installation you simply start the application, logon with the credentials provided to you by your system administrator and you are ready to go.

GETTING STARTED

Your Account Manager is at hand to provide a demonstration of SpeechReport Cursor. They will talk you through the many benefits this simple but powerful application has to offer.
