G2 MOBILE - DICTATION

DICTATE YOUR DOCUMENTS WHILST ON THE GO!

There's such a huge appetite at the moment, more so than ever before, to be well connected. Mobile working is revolutionising the way in which employees from healthcare, legal and business backgrounds are communicating. Our mobile suite, G2 Mobile offers professionals the ability to dictate and authorise documents whilst on the go.

As part of this portfolio we currently offer two solutions, the digital dictation application and the sign off application. G2 Mobile extends your workflow by connecting directly to the SpeechReport platform.

The digital dictation app provides a clear overview of your day to day work list. This app enables you to record your documents whilst on the go and send them to the secretary.

The sign off app provides you with instant access to correspondance and enables you to authorise your documents and forward them to the next step in the workflow.

KEY BENEFITS OF THE G2 MOBILE DIGITAL DICTATION APP

- Part of the G2 Mobile solution
- Fully integrated with SpeechReport
- Linked to clear work list with client details
- Dictate whilst on the go
- Suitable for mobile and tablet devices
- Available on iOS and Android devices
- Following ISO 27001 and secured encryption of data.

USER FRIENDLY SOLUTION

The mobile dictation app has been developed with the user in mind: with an intuitive design and a modern interface. As the app is integrated with SpeechReport the manual configurations are kept to a minimum. Additionally, the app will be prepopulated based on the preferences of the team or department. The work list provides an overview of your agenda for the day ahead. The dictation can be linked to a specific appointment or created as an ad-hoc dictation.

The app is compatible with external hardware including bluetooth headsets or earplugs.

Simply log on and start dictating!

SECURITY

G2 Mobile meets strict conditions to ensure the safety of client data.

The app has been designed according to ISO standards and is NHS compliant. This means that no data will be locally stored on the device and the app will automatically log out after a period of inactivity.
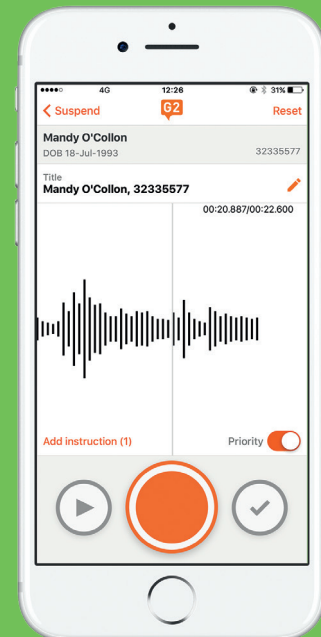

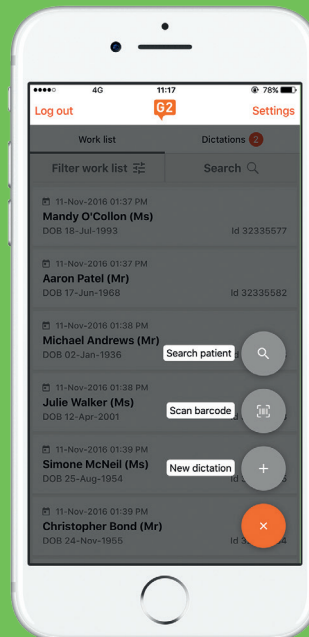

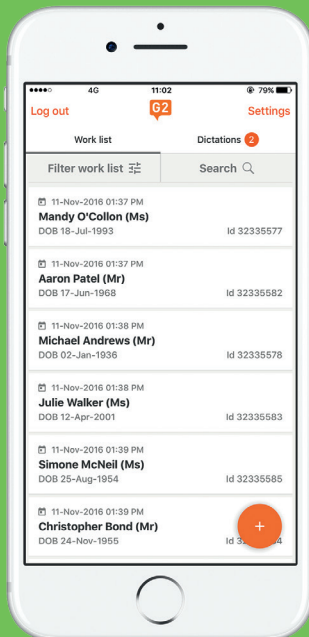

The security of the data transfer is guaranteed by SSL certificates and encrypted at a minimum of 256 bit.

Secure log in is ensured by utilising SpeechReport credentials, a pin code or the fingerprint scanner.

ADVANTAGES G2 MOBILE

G2 Mobile offers the ability to mobilise a part of your workflow. The mobile suite provides you with instant access to your correspondence and work list from anywhere. The app enables you to record those highly important details whilst the information is still fresh in your mind! Thus reducing the risk of reporting incorrect information whilst making the most of your precious time.

Dictating and authorising documents on the go reduces the turnaround times of reports even further.

G2 SPEECH
DOING MORE WITH SPEECH
