Vacancy: Software Engineer

Hours: 40 hours
Office location: Best (NL), Cork (IE), Budapest (HU)

Job summary
The role involves working in an international development team, consisting of 15 .NET developers. Divided in four multi-disciplinary SCRUM teams making it important to have excellent communication skills. As a software developer your responsibilities include gathering user requirements, designing system functionality and writing code.

Ultimately, the role of the Software Engineer is to build high-quality, innovative and fully performing software that complies with coding standards and technical design.

Your personal skills should include strong communication skills, drive to create great products, eagerness to produce quality and focus on the end user.

Experience
- Bachelor or Master Computer Science degree
- At least four years of experience in software development, both back- and front-end using Microsoft technologies (.NET)
- Experience with CI/CD is desired
- Awareness of best practices and design patterns
- Fluent in English, speaking Dutch or Hungarian would be beneficial.
