G2 e-Learning

G2 e-Learning provides users with an intuitive, mobile, self-paced and detailed online training platform enabling efficient learning. The training package covers basic, as well as advanced techniques, of using the SpeechReport solution – all at a location and time convenient to you.

Key benefits of the G2 e-Learning package

1. Built to accommodate everyone's needs

The online method of learning is suitable for anyone with different levels of skill. Users can choose from various training materials on mobile devices, tablets or desktop computers.

2. Access content as frequently as you like

With our online learning platform users can access content as often as they like. This is particularly useful when users would like to enhance their skills and improve productivity levels in their daily roles.

3. Access to updated content

The G2 e-Learning platform is updated regularly with new releases, including the use of added functionalities. These new modules will be available to users when they receive SpeechReport upgrades.

4. Reduction of time taken to learn

Users can define their own speed of learning instead of following the speed of the whole group. They can also learn in the comfort of their own environments and concentrate on areas of weakness – train and turn them into strengths. Users can also choose to study specific and relevant areas of the learning material without the need to cover each area of the platform.

5. Readily available 24/7

Within a short time-scale everyone can be upskilled, inclusive of those for example working remotely, working late and returning from holiday. We now have the ability to support users 24/7 with the e-Learning platform.

"G2 e-Learning is a great safety net for new users and it will come into its own when Junior Doctors come on board."
