The AI-powered, ultimate time-saving solution for clinical reporting

SpeechCursor enables healthcare professionals to swiftly generate precise patient documents directly into any application, from anywhere, across multiple systems. By simply placing the cursor and speaking, text populates instantly. Intuitive voice commands allow effortless navigation and amendments. With its AI-powered voice, vocabulary, and word recognition capabilities, **SpeechCursor** ensures exceptional accuracy and validation in record time.

A cloud-based solution, **SpeechCursor** is readily available anywhere and at any time, and eliminates the need for infrastructure and application management investments.

KEY FEATURES

Flexible dictation

Dictation, editing, authorisation — from anywhere and directly into any application.

Cloud-based

No need for infrastructure and application management investments.

User profile ownership

With complete control over individual voice profiles, users can customise their library to meet their unique needs.

SpeechCursor

PRODUCT FEATURES & BENEFITS:

- Dictate at cursor, directly into the application of your choice
- Unparalleled accuracy through Voice AI technology
- Accent and dialect recognition
- No voice profile training required
- Suitable for any medical specialty
- Intuitive and easy to use
- Navigate using voice commands
- Ability to add new words to lexicon
- Scalable
- Create auto-texts with variable fields
- Command & control functionality
- Access your account from anywhere
- Minimal footprint

Dictate into any application with unparalleled accuracy utilising Voice AI

SpeechCursor is powered by **Atlas**, our innovative speech recognition platform with Voice AI, based on Neural Networks and Deep Learning technologies. The platform provides the highest level of accuracy in speech recognition and supports specialised medical terms and dialects, ensuring optimal recognition results without the need for training. **Atlas** easily adjusts to voice nuances, accents, and speech variations, minimising disruptions, and external influences.

Scalable

As a cloud-based product, **SpeechCursor** is suitable for small installations from just a few workstations to large scale, full organisational rollouts.

Quick and flexible

Quick and simple to get set up. Dictate and correct documents directly into any application, from any location.

Low investment

As a cloud-based solution, **SpeechCursor** requires no investments in infrastructure and application management.

Premium support

Seamless product integration and implementation backed by outstanding after-sales support.
