✦✦ **AIDA**
AI DIGITAL ASSISTANT

Aida – Powerful AI technology that truly understands clinicians

PROVIDING IMPACTFUL, CONVERSATIONAL AND PEOPLE-CENTRIC AI SPEECH SOLUTIONS THAT DELIVER EFFICIENCIES FOR HEALTHCARE PROFESSIONALS WITH EASE.

Aida is a digital assistant built for medical specialists, designed to support clinical reporting by simplifying dictation, eliminating the need to dictate punctuation, and enabling quick summarisation. It acts like a personal secretary, handling rephrasing, translation, and generating patient-friendly versions of reports.

Aida enriches clinical reporting, improves communication, enhances accuracy, reduces workload, and simplifies documentation for greater efficiency. Utilising Large Language Models (LLM), neural networks and deep learning technology, our AI innovations further automate medical documentation with unparallelled accuracy, speech and efficiency - empowering clinicians to focus on what matters most; patient care.

KEY FEATURES

Enhanced Documentation

Provides an AI Assistant, text optimiser, and summarisation features at the click of a button for quicker, more accurate documents

Multi-Language Translation

Translates medical transcriptions and generates patient-friendly versions instantly - creating clear, inclusive documentation without a translator

Data Privacy and Security

Adheres to ISO and GDPR regulations using robust encryption methods to safeguard patient data.

G2 SPEECH

- Improves medical documentation accuracy
- Refines communication and streamlines documentation
- Releases time and boosts efficiency
- Relieves cognitive load and reduces admin burden.

SPEECHCURSOR

Aida is embedded in **SpeechCursor**, our cloud-based dictation tool that allows clinicians to speak directly into any application with unmatched accuracy and flexibility.

As a cloud-based solution, **SpeechCursor** is available anywhere, at any time - eliminating the need for infrastructure and application management investments.

SpeechCursor is created for medical settings from just a few workstations to large scale, full organisational rollouts.

- Flexible dictation
- Cloud-based
- User profile ownership

G2 SPEECH CURSOR ✦ AIDA

REDEFINE PATIENT CARE AND ENGAGEMENT WITH AIDA

Quick and flexible

Quick, flexible and simple to use.

Suitable for medical settings

Aida can work in busy and loud medical environments.

Premium support

Seamless product integration and implementation backed by outstanding after-sales support.

SPEECHAMBIENT – AMBIENT AI FOR CLINICIANS

SpeechAmbient provides added value with the ability to record and summarise conversations between multiple people. Automated Speaker Labelling will also quickly identify and tag different speakers in a transcription (e.g. consultant/patient clinics and multi-disciplinary team meetings) using our software to automate their reporting processes.
